Founder | Blogger

Jan 2012 - Present

Santekno.com

As the founder of Santekno.com, I actively share my passion for technology by writing and publishing tutorials focused on software development, programming, and modern tools. Through this platform, I create educational content that helps developers and technology enthusiasts learn practical skills, explore new frameworks, and stay updated with industry trends. My goal is to build a knowledge-sharing community where technology is made more accessible, inspiring others to grow and innovate in their careers.

Skills: Hugo • Site Generator • Blogger

Senior Software Engineer

Jul 2019 - Present

As a Senior Software Engineer, I am responsible for managing and optimizing the merchant voucher services to ensure seamless operation and alignment with product features. I actively develop new features that support business needs while collaborating closely with product teams to deliver relevant and high-impact solutions. My role also involves monitoring and addressing day-to-day service issues, ensuring system stability and performance. Additionally, I focus on optimizing existing services to enhance efficiency, scalability, and reliability, leveraging technologies such as Golang, Kubernetes, Redis, and Elasticsearch. My expertise in microservices architecture and DevOps practices enables me to contribute to the continuous improvement of the platform while maintaining high standards of software development and system architecture.

Skills: Go Language • Leadership • NSQ • Microservices • Redis • ElasticSearch • GIT • DevOps
